Hurricane Harvey

DR 4332 Hurricane Harvey Declared Counties

- Declared A-G
- Declared A and B
- Declared B Only

Overview

- **Harvey made landfall as a Category 4 Hurricane with winds of 130 mph near Rockport, Texas on August 25th and continued its slow movement up the Texas coast dropping 33 trillion gallons of water.**
- **It was the longest Texas landfalling hurricane on record and caused widespread destruction along the coast of Texas.**
- **Causing about \$125 billion in damage, Harvey ranks as the second-most costly hurricane to hit the U.S. mainland since 1900.**
